

CASE STUDY

CAMPBELL'S SOUP COMPANY Napoleon, Ohio

Campbell's Soup Company contracted with GreenTech Energy Services to help reduce energy costs in its 2,387,448-square-foot plant in Napoleon, Ohio. GreenTech replaced metal halide fixtures with T8 fluorescent fixtures that are sealed and gasketed to accommodate a washed-down environment. All T12 technology was eliminated. The plant is noticeably brighter and the new lights run cooler, which is important in a food environment where the workspace can become overheated. As a result, working conditions in the plant have been improved while energy consumption and costs have been lowered.

RESULTS

Savings

Program Costs	\$2,425,937
EPACT Tax Savings	\$593,793
Payback	2.3
KW Saved	1,032
KWH Saved	10,099,990
Energy Savings	\$740,006
Operational Savings	\$72,778
Total Savings	\$812,774

Environmental Impact

Reduction in Carbon Dioxide (pounds)	15,149,986
Reduction in Sulfur Dioxide (grams)	56,559,948
Reduction in Nitrogen Oxide (grams)	25,249,977
