Heritage Towers

GreenTech Energy Services completed a turn-key lighting retrofit project for the Heritage Towers Nursing Home in Doylestown , Pa. The project had a 2.1 year payback and resulted in energy savings and an improved overall aesthetic environment.

Saint Mary Manor Nursing Home and Retirement Center

Saint Mary Manor is part of the Philadelphia Archdiocese Catholic Health Care Organization. This facility was chosen as a test site for the Diocese to demonstrate the financial and technical benefits of a lighting retrofit program. The program cost was \$100,843 with energy and operational savings of 451,127. The project had a 2 year payback. John Chapman , Nursing Home Administrator had this to say about the project. "I was on vacation for 2 weeks while the project was being installed and couldn't believe the noticeable difference the energy efficient lighting had to our facility. The new technology gives our facility a much warmer feel and has saved significantly in our electric bill."
